

## Account Trigger

Create a trigger on the standard Account object that adds a default contact if one does not exist.

```
trigger AccountTrigger on Account (before insert){  
  
}
```

### Run Code Results

#### Runtime Error

```
IndentationError: expected an indented block  
import sys  
Line 4 (Solution.py)
```

## Run Code Results

Compile Results: **SUCCESSFUL**

After pressing "Run Code"
